

defi

Remain Connected – in ANY Weather!

The **defi** satellite system is an Agiosat innovation (patents pending), designed to keep any operation online, whatever Mother Nature throws at you.

Extreme weather is no match for the **defi!** –

- **Mount it on a PSAP, EOC or other Critical Infrastructure facility**
- **IP-centric network keeps critical voice and high-speed data services alive when terrestrial-systems go offline**
- **Resilient system integrates with your fixed infrastructure for automatic take-over**
- **Remain in *total* control of your operation!**
