

# Responder Series

## Instant Connectivity - Anywhere!

Agiosat Responder Series satellite platforms are trailer-based innovations designed with your operation in mind. These systems automatically establish a wide range of connectivity (from small to herculean) with the push of a button! These systems will get you back online, or establish a connection “on-scene”, instantly - **anywhere!**

Agiosat Responder trailer systems are the building blocks for resilient connectivity and instant infrastructure, in both routine and recovery situations –

- **Recover and restore connectivity at a PSAP, EOC or other Critical Infrastructure facility**
- **IP-centric network keeps critical voice and high-speed data services alive when terrestrial-systems go offline**
- **Resilient system integrates with your fixed infrastructure for automatic uplinks**
- **Wide range of system connectivity options - 4 to 45Mb uplinks**
- **Remain in total control of your operation!**

Agiosat Global Communications – Texas DIR Contract DIR-SDD-1299  
Call the Texas Government Services Team at 877-728-2668

These amazing systems are designed to be set-up, placed online, and left unattended for 48 plus hours. Robust commercial grade components provide secure, reliable operation. Personnel can place Responder systems in-service with minimal training.
