

MOBILITY & CONNECTIVITY

VoIP for Production

The Easier and Less Expensive Way to Communicate From A Venue

- No coordination or local installations required. It is set-up and operating in 5 minutes.
- Keep the same phone numbers for the same production unit. Phone lists stay the same.
- Or move the phone number with the phone unit, your choice.
- Easily intergrates into production infrastructure.
- Four digit dialing for every phone on the system.
- Direct long-distance dialing almost anywhere in the world.
- Full features including conference bridge, multiple calls on the same unit, voice mail, etc.
- Very low operating cost and low set-up cost.
- Each site has capacity for over 100 phone lines.
- Needs only 8 rack units.
